

[Download OSHI Defender Monthly 5 PC](#)

OSHI Defender is a cloud antimalware application that scans and cleans your computer automatically. Just set up your preferred scanning schedule and let OSHI Defender protect your PC from malware threats. We allow to create and customize your own scanning profiles to suit your needs. Our smart scanning engine delivers faster scanning speeds and superior protection against day malware threats. With OSHI Defender you can also send file information to our secure servers for additional scanning and protection in the cloud. Our constantly updated malware database and scan engine ensures that you have the latest defense against emerging malware threats. Resolve identified threats with manual or automatic removal action. OSHI Defender's nondestructive "Disable" and "Fix" actions are also completely reversible.
